

12 AUGUST 2026 · FOR THE TEAM

PARCEL C: WHAT REMAINS.

The third parcel never contained files to return; its deliverable is a live campaign. The deploys are done and verified. What remains happens in the studio: one full rehearsal, the team's phones, and the QR on the wall.

DEPLOYED AND VERIFIED

PRODUCTION · BOTH DOORS LIVE

- ☒ **The public door.** The landing is live at fittingroom.noregrets.tattoo; /book bounces to the live schedule, tested end to end.
- ☒ **The private door.** The Booth OS is live at ops.nora.tattoo: curtain up, library complete, generator wired to the register. Certificates green on both, checked from both sides.
- ☒ **The archive.** The version-of-record zips are filed in the Campaign folder under the studio account, dated.

THE DRY RUN · ONE FULL PASS

COMPLETED 12 AUGUST · FINDINGS FOLDED INTO THE KIT

- ☒ **Walk the test submission through.** Confirm its attendance, create its PARTICIPANTS row, and assign the next unassigned code from CODES.
- ☒ **Test the referral.** Send the card 03 email to yourself, open your own share link and check the code pre-fills. Book a second fake customer through it, submit their form, log the attendance.
- ☒ **Check the chaining.** Add the two ENTRIES rows for the qualified attendance, one per party, same timestamp, exactly as the chaining map shows.
- ☒ **Rehearse the draw.** Run the machine over the test entries with the TEST watermark, per the runbook, and screen-record it the same way draw day will be recorded.
- ☒ **Void the test rows.** Every test row across every tab: Valid? = NO, never deleted, so the audit trail stays intact.

INSTALLS AND THE TILE

THE LAST TWO MOVES

- ☐ **The phones.** Every team phone installs the OS from ops.nora.tattoo via the five-tap guide. The curtain word is shared in person; the gate note explains the rest.
- ☐ **The tile.** The studio QR, encoding the fittingroom address, printed from the generator and up on the wall. One tile for everyone, and it goes up last.

**COMES BACK:
A LIVE CAMPAIGN.**
