

12 AUGUST 2026 · FOR THE TEAM

PARCELS A AND B, COMPLETED.

Every item from the infrastructure and account-configuration workstreams is done and verified. The campaign's machine now exists end to end: domain, landing, booking, form, register, generator.
What remains is ceremony.

PARCEL A · INFRASTRUCTURE & CUSTODY

ARNOLD · WEB & IT · CLOSED WITH COMPLETION NOTE

- ✓ **Credential rotated.** The handover password no longer authenticates; the replacement lives in the studio vault, and only there.
- ✓ **2-step verification and recovery.** Enrolled on the studio phone, recovery configured, backup codes filed in the vault.
- ✓ **Vault custody.** Account entry held with access for IT, production, and the Chairman's office. The account survives any one person leaving.
- ✓ **Public DNS.** fittingroom.noregrets.tattoo resolves to the landing deployment; domain verified, certificate live.
- ✓ **Operations DNS.** ops.nora.tattoo resolves to the Booth OS deployment; verified, certificate live, curtain up.
- ✓ **HTTPS check passed on both** subdomains, in a standard browser, from IT's side.
- ✓ **Workspace switches confirmed open:** Apps Script web apps deployable with "Anyone" access; Forms accepting external respondents; booking page publicly reachable.
- ✓ **Completion note filed** with the campaign records, with a name and a date on it.

PARCEL B · ACCOUNT CONFIGURATION

RUN BY PRODUCTION FOR SPEED · BUILT ON THE INTERNS' PACK

- ✓ **Appointment schedule live:** "The Fitting Room · Preview session", 30 minutes, downstairs hours, two-week window, guests cannot invite others: one person, one booking, one form.
- ✓ **/book is canonical.** The booking link is baked into the redirect and redeployed; fittingroom.noregrets.tattoo/book bounces straight to the live schedule, tested.
- ✓ **The register lives in Drive** as a Google Sheet under the studio account, four tabs, the hundred preloaded codes intact, CHAINING rule aboard. The old tracking sheet is retired.
- ✓ **The endpoint is deployed** and answering its health check; the URL is held on the operations side only.
- ✓ **Generator handshake confirmed.** A test batch posted from the OS landed in CODES and was cleared; supply stands at exactly one hundred.
- ✓ **The form is built and bound:** six fields, validations, both consent lines, confirmation pointing at /book, responses landing in the register.
- ✓ **Open to the public.** Responder view set to anyone with the link; loads without a Google login, proven in a private window. Editor access stays studio-only.
- ✓ **The form link is in the kit:** slotted into the pre-appointment email on the dialogue cards.
- ✓ **The dry run's first citizen is seeded:** one test submission sits in Form Responses, waiting to be walked through the whole machine and voided with ceremony.

WHAT REMAINS IS CEREMONY:
DRY RUN · INSTALLS · THE TILE.

CHASER 1 SEPT · REHEARSAL 10 SEPT
DRAW WEDNESDAY 16 SEPTEMBER
